

# New Demands for Bandwidth #ARVIGCONNECTED

At a time when internet traffic is surging,  
the Arvig network is up to the task.

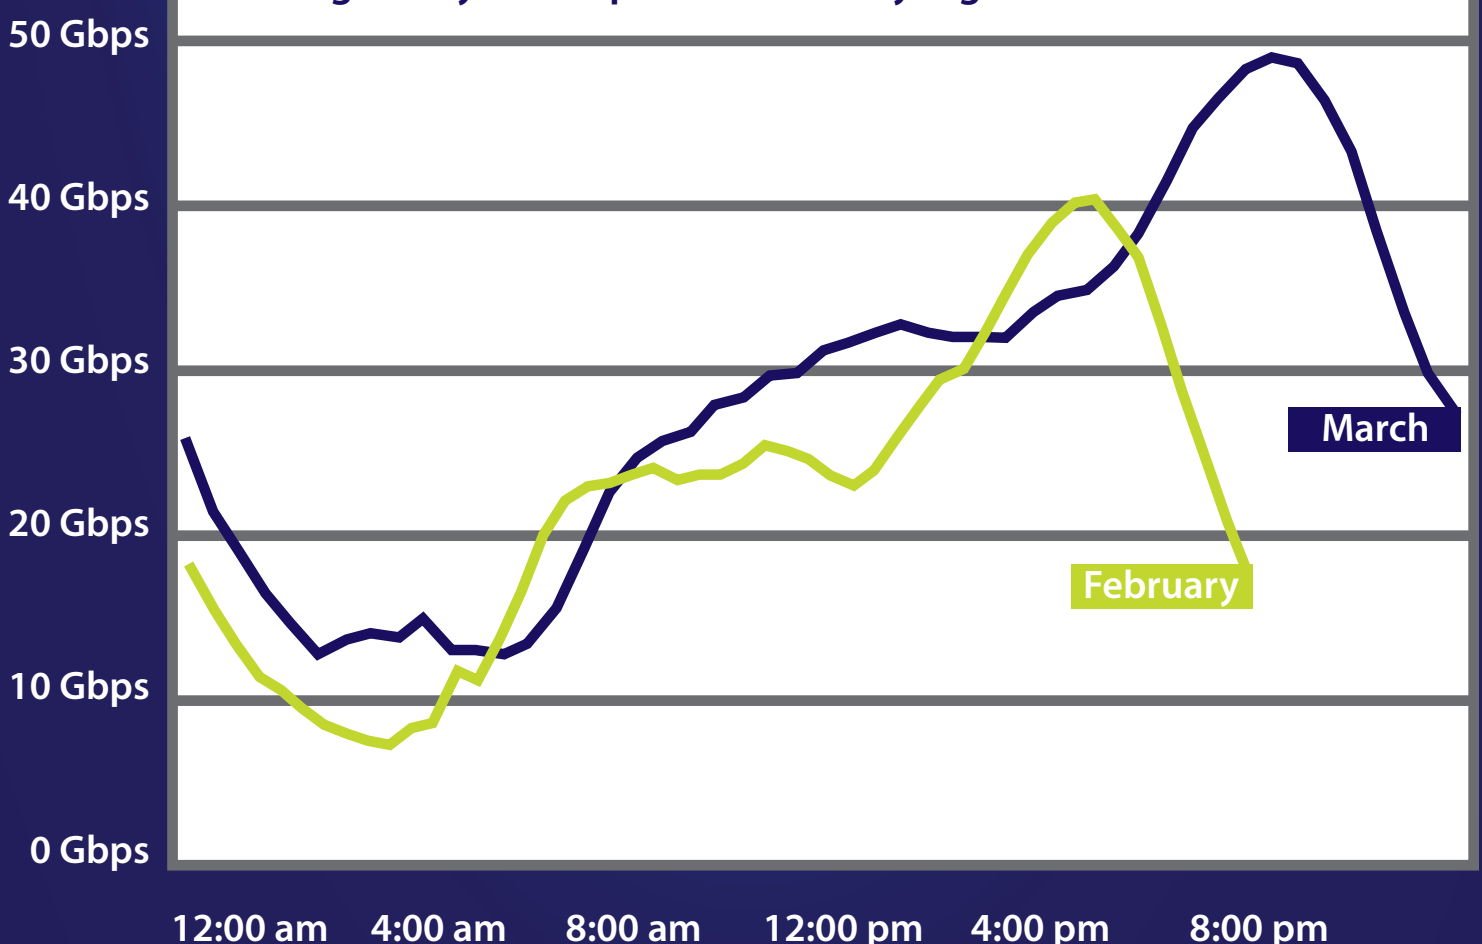

Changes are happening for residential and business customers all across the Arvig service area as a result of the COVID-19 pandemic.

As schools shift to Distance Learning and businesses direct employees to work from home, Arvig's broadband network—which spans more than 9,000 square miles and serves more than 46,000 internet customers—is seeing an unprecedented—but not unexpected—surge in internet traffic.

Overall, **peak internet traffic** on the Arvig network has **increased 46%**, with an **average increase in use of 22%** in March compared with February.

Arvig reached a historical peak in total traffic during this period—hitting nearly 120Gbps on a Saturday night in late March of 2020.

The bottom line is, we are here to connect you.
